EXCITING NEW BEGINNINGS

2022 STEWARDSHIP APPEAL

CRAFTING ENGAGING SPACES FOR ALL PEOPLE IN GOD'S HOUSE

We intend to provide for greater flexibility and inclusion in the life of our congregation by refreshing our physical gathering spaces, to encourage participation by people at all stages of life.

Matthew 28:18-30: Jesus said, "Go therefore and make disciples of all nations, baptizing them in the name of the Father and of the Son and of the Holy Spirit, and teaching them to obey everything that I have commanded you. And remember, I am with you always, until the end of the age."

GOAL: \$20,000, \$385 PER WEEK

Imagine attending worship with a young child and you have trouble engaging in worship. You're concerned about their being disruptive. You may also be wondering how you can help their faith grow during worship. What if the worship space included an area for you and your children to explore faith and move more freely? **We intend to** create a flexible, child-friendly area on the left side of the worship space where families can stay together while children have the freedom to engage in activities connected with worship.

Imagine during services you find the need to remove your child from the space. What if changing facilities and a quiet area that would allow you to remain connected with worship were readily accessible to you? **We intend to** refresh the welcome center area to make it more useful for families with young

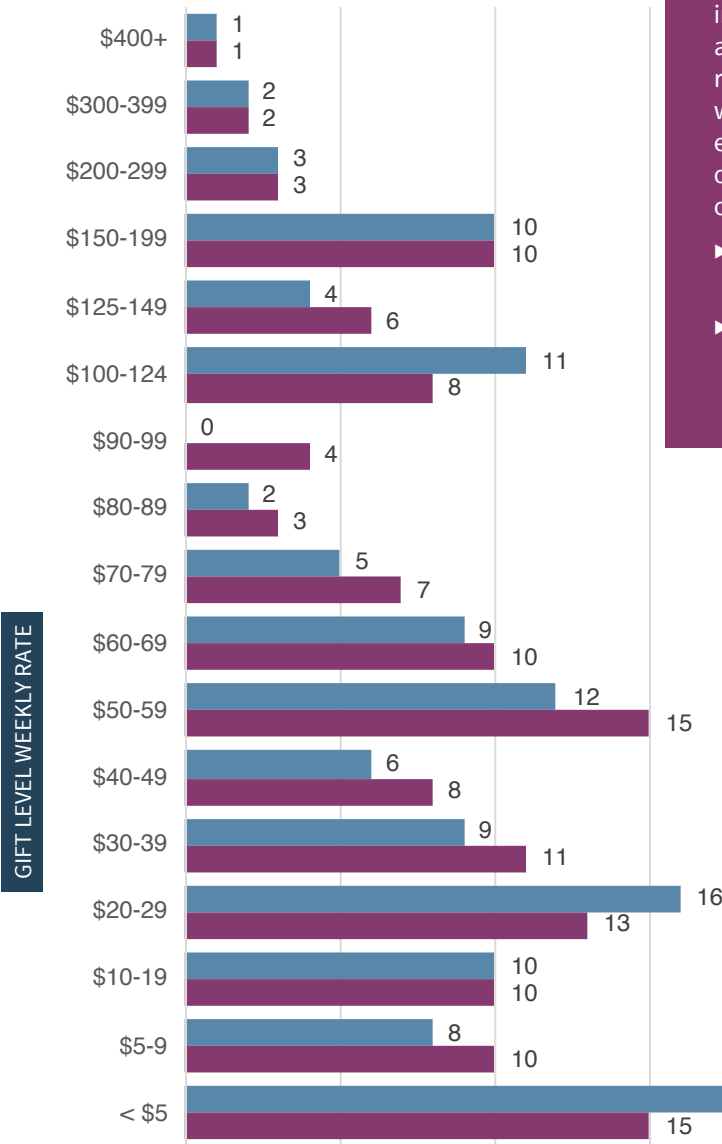

children, including installing changing stations in the welcome center bathrooms.

"Chairs are more welcoming than pews. At an unconscious level a visitor feels pews are old fashioned, rigid, and uncomfortable."
-Formerly attended Holy Trinity with pews and now attends a church with chairs

Imagine you have mobility issues, need more space to feel comfortable in worship, or have trouble sitting in traditional pews. What if the worship space featured upholstered, padded chairs allowing greater comfort for you and flexibility for our congregation? **We intend to** remove pews from the worship space and replace them with individual padded chairs. This will preserve seating capacity, increase accessibility, and allow for greater flexibility in using the space.
